

Draw-up Tube

The ACS draw-up tube has been designed to fit on the suction side of chemical delivery hose to give a filtered non-return supply of chemical. It is available in standard lengths of 1.25m, 0.9m and 0.75m – suitable for 1000L tote tanks, 205L and 25L drums

respectively. Custom lengths are available on request. The draw-up tube is manufactured from PVC for high chemical resistance and can be supplied with fittings for hoses of size 4/6, 6/9, 6/11, 9/12 and 10/15 (ID/OD in mm). Maximum flow rate is 120l/h.

Outside Diameters

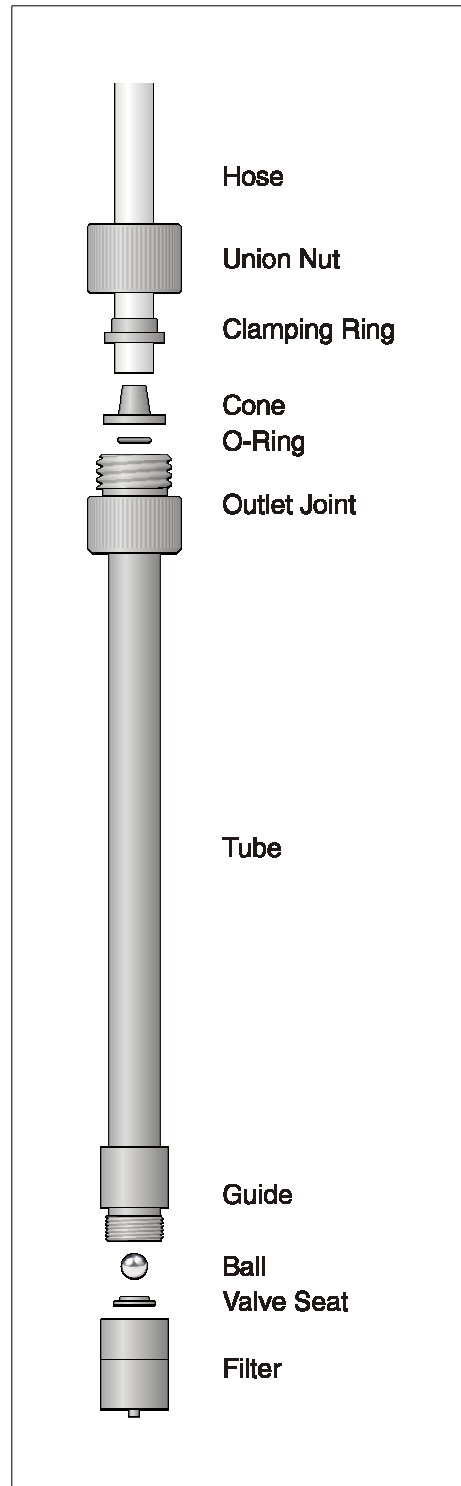

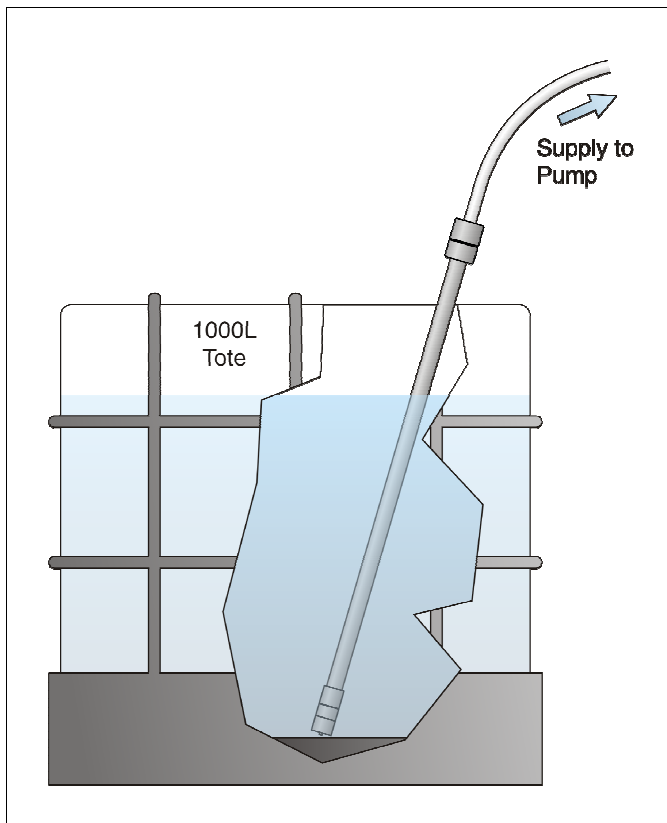

Union Nut	38mm
Outlet Joint	
Tube	21.3mm*
Guide	
Filter	27mm

* Narrower tube is used for low-flow applications.

Ordering Information
